Students gain research experience in the following areas:

- **Genomics and Systems Biology**
- **Biotic Interactions**
- **Environmental & Stress Responses**
- **Chemical Biology**
- **Enabling Technologies**

**Students in the internship program will have the opportunity to:**

- Work closely with graduate students, postdoctoral fellows and scientists on a supervised independent project within the framework of the mentor’s research program
- Attend weekly plant science seminars with scientists from BTI, Cornell and the USDA
- Present their research to the other students, scientists, and mentors at our PGRP Student Symposium
- Attend lab meetings, read and discuss recent literature related to their project
- Learn about graduate school, scientific careers and work in an international environment

**SUMMER INTERNSHIPS 2014**

The Plant Genome Research Program offers paid, 10-week summer internships for undergraduate and high school students interested in discovering how plant research can protect the environment, enhance human health, and improve agriculture.

**Duration**

- **Undergraduate Interns**
  - June 2 – August 8, 2014

- **High School Interns**
  - June 30 – August 8, 2014

**Interns receive**

- **Housing** Undergraduate interns will receive group housing on Cornell campus.
- **Stipend** Up to $4,500 stipend, plus meal allowance and travel subsidy.

**Eligibility**

Students must be either US citizens or permanent US residents (green card holder). Undergraduate applicants must be enrolled in a college/university. For the undergraduate internship, you must be at least 18 at time of internship.

**Who should apply**

All undergraduates and high school students with interests in:

- Biology
- Biochemistry
- Biological Engineering
- Bioinformatics and Computer Science
- Science Education
- Underrepresented minority students, first generation college students and students from small colleges are strongly encouraged to apply.
