The Boyce Thompson Institute for Plant Research at Cornell University offers summer internships to enrolled undergraduate and high school students interested in biological research. Our internships provide an excellent opportunity to gain research experience and explore if a scientific career is right for you. Currently we have positions in two areas: Plant Genome Research and Bioinformatics.

TO APPLY:
More information and application materials are available at: bti.cornell.edu/Internships

OVERVIEW:
Work in an international community of scientists who collaborate in research to protect the environment, enhance human health, and improve agriculture around the world.

Housing Undergraduate interns will receive group housing on Cornell campus.

Stipend Up to $5,250 stipend, a $1,050 meal allowance, and reimbursement up to $500 for eligible travel expenses.

Eligibility Students must be either US citizens or permanent US residents (green card holder). Undergraduate applicants must be enrolled in a college/university. For the undergraduate internship, you must be at least 18 at time of internship. Opportunity is open to both enrolled undergraduates and high school students.

Duration Undergraduate interns: June 1–August 7, 2015/
High School interns: June 29–August 7, 2015.

APPLICATION DEADLINE: All application materials are due no later than Friday, February 6, 2015
